

Important dates

October 2004
1st call for papers

February 15, 2005
submission of abstracts

April 1, 2005
notification of acceptance

June 10, 2005
detailed programme publishing

July 1, 2005
camera ready submission
of full papers and poster descriptions

July 30, 2005
early payment deadline

September 6, 2005
tutorials

September 7 — 9, 2005
the conference

Conference Fees

Standard three-day rate	390 EUR
Reduced three-day rate*	290 EUR
One day rate	150 EUR
Student three-day rate	150 EUR

* For payment received by July 30th, 2005

All rates include the Proceedings.

Public partners & sponsors

Interested public partners and companies are kindly requested to contact the conference chairman.

Masaryk University, Brno

Founded in 1919, Masaryk University is the second largest university in the Czech Republic in terms of number of students in accredited degree programmes. One of the major strategic goals of Masaryk University is the internationalisation of the University. Environmental protection is studied within the faculties of Science, Medicine, Informatics, Social Studies, Economics and Administration, Law, at the Research Centre for Environmental Chemistry and Ecotoxicology and the Centre of Biostatistics and Analysis.

The City of Brno

With a population of almost 400,000, Brno is the second largest city in the Czech Republic. As the capital of Moravia, Brno is the seat of country's judiciary and a major centre of trade-fairs. There are six Universities in Brno. It was in Brno that Gregor Mendel discovered his laws of heredity, Viktor Kaplan produced the first water turbine, Leos Janacek composed his musical works and where Milan Kundera wrote his first novels. Brno is the birthplace of Kurt Godel - one of the world's most important 20th century scientists.

Call for papers

This Conference continues the successful series of conferences dedicated to information exchange among scientists, public administrations, private and public companies involved in environmental information processing as well as among environmental informatics end-users.

Enviroinfo 2005 is a meeting place for experts from cutting edge technologies, fostering information flows across Europe and beyond.

It will cover a wide range of environmental information systems topics. It will highlight state-of-the-art research, development and application, with a special focus on the topic of Networking environmental information - as systematic approaches to information in the world for a sustainable development.

The conference language is English.

A parallel conference workshop track will be included in German for contributions on matters of specific interest to German speaking countries.

The participants

Regular participants in Enviroinfo 2005 include scientists, managers and decision makers for various disciplines, specialists from the IT industry, governmental institutions, environmental agencies and networks, specialists of theoretical and applied informatics, managers and experts for environmental technology companies, students and the concerned public.

Topics

- ❖ Environmental information systems engineering
- ❖ Modelling, simulation and computing
- ❖ Geographical information systems and their applications
- ❖ E-government in the enlarged Europe and environmental web services
- ❖ Environment, Health and Security (e-Health)
- ❖ Knowledge management and decision support systems
- ❖ Statistics (Environmetrics) / Chemometrics
- ❖ Standardisation of environmental data and information management / Metadata, Protocols
- ❖ Corporate sustainability communication and reporting
- ❖ Environmental law and e-commerce relations
- ❖ Urban environment (landscape, urban planning,...)
- ❖ E-learning and support of environmental awareness building
- ❖ Environmental Informatics in the 7th Framework programme of the EU

Tutorials

- ❖ Human and ecological risk assessment, expert systems
- ❖ Decision support in enviromatics, risk management, using universal information robots
- ❖ Environmental knowledge management
Knowledge management in distributed environmental networks

Workshops

- ❖ Sustainability indicators - dedicated to the jubilee of Bedřich Moldan
- ❖ E-government and enviromatics
- ❖ Networking sharing and knowledge exchange in an enlarged EU
- ❖ Ecolnforma

Invited talks

Invited speakers will be invited to introduce keynote sessions. They will outline the state-of-the-art and give overviews on the main conference topics.

Contributions

Contributions will take the form of:

- ❖ papers and oral presentations (workshops)
- ❖ posters.

All selected papers will be published in the Proceedings, which will be distributed during the conference.

Organisation

Masaryk University, Brno
Czech Republic

Conference Chairman:

Prof. Dr. Jirí Hřebíček
Centre of Biostatistics and Analyses
Faculty of Medicine and Faculty of Science
Masaryk University, Brno
hrebicek@cba.muni.cz

Organisation Committee Chairman:

Dr. Jaroslav Rácek
Faculty of Informatics
Masaryk University, Brno
